Re: Annual Recycling Data Collection

Dear Recycler:

In order to generate a report that accurately reflects the state of recycling in Nevada, the Nevada Division of Environmental Protection (NDEP) collects recycling data annually, per NRS 444A.070. Municipalities with populations greater than 45,000 are required to provide certain recycling services per NRS 444A.040 and are expected to participate in this survey. All municipalities are encouraged to participate. Each municipality's data is compiled by NDEP into a biennial report to the state legislature, which is posted on <http://nevadarecycles.nv.gov/Resources/Data/>.

We would greatly appreciate your cooperation with municipality employees working to gather recycling data in a timely manner. The data collection form that may have been provided to you by the municipality can also be found online at <http://nevadarecycles.nv.gov/Resources/Data/> (Form B). The form standardizes data collection and lists the materials typically counted as recyclable in Nevada. Only materials generated within the county in which your business operates should be counted. It is also important to indicate which processor or collector your recyclable materials go to in order to minimize double-counting those same materials.

If you have any questions, please contact the State of Nevada's Recycling Coordinators.

Thank you for your assistance.

Sincerely,

Rachel Lewison
